

MBT-KR52: long term banner advertising system

</en/advertising-systems/mbt-kr52/>

Facade advertising with a uniquely plain banner surface

Our model **MBT-KR52** is a **large-dimension advertising system** for **long-term outdoor advertising** on **facades, walls and buildings** with banners. The system **consists exclusively of high-quality aluminium and stainless steel components**.

The special feature of the MBT-KR52 is the **tensionable mounting and connecting elements**. Both, stainless steel tensioning brackets and corners, **ensure a uniquely smooth surface for your façade advertising**.

This system **can be freely configured** and **will be manufactured according to your needs and on demand**.

Properties

Elegant, large format advertising

The MBT-KR52 advertising system is used to display large-scale advertising with banners on buildings and facades.

This system is another gem from our selection and is characterised by the exquisitely stretched banners displaying plain surfaces.

For the production we use only selected quality materials for the demanding use in all weather conditions.

- Exquisite surface tension of advertising
- Practical design with easy assembly
- Dimensions according to your wishes

Uniquely tensed

Our MBT-KR52 is uniquely exciting. The advertising system offers tensioning elements at all fastening and connection points, which allow you to fasten the advertising banner completely wrinkle-free.

At the same time, the round keder sits firmly all around in the aluminium profiles. This design allows for an elegant and visually uninterrupted transition from advertising to frame system.

- Uniquely tensed banners
- Tensioning elements all around
- Special designs possible

Properties

Simple installation

We always put ourselves in our customers' shoes and produce advertising systems that are not only visually appealing but also practical to use.

The MBT-KR52 also combines these important requirements and offers you high-quality yet easy-to-understand technology.

The system can be mounted with standard tools.

- Easy to understand technology
- Installation with standard tools

Components that have it all

The MBT-KR52 is a system that has been thought out down to the last detail. Each component combines purpose with unique user-friendliness and functionality.

Flexible stainless steel tensioning brackets provide a solid wall-connection, and give control over position and tension of the banner.

The ingenious tensioning corners allow you to continue the tensioning right into the corners of your banner advertising.

- stainless steel tensioning brackets
- stainless steel tensioning corners
